

# GREEN

## SUKABUMI STONE

### About Green Sukabumi

**Green Sukabumi Stone** is one of the internationally famous natural exotic stone. This Green Stone is a type of hard quartz while the name is derived from the stone quarry in the area of Sukabumi, West Java.

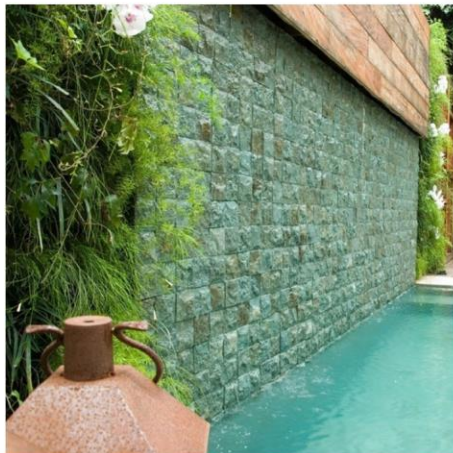

This is widely used for fences, walls, housefloors, swimming pools, fish ponds (ornamental ponds), bathrooms, pillars, gardens, etc. The green color of this stone is properly used on the outside of the house because it looks natural.

But it could also quickly blend with your garden and get up to give a fresh impression or look to the residents of the house.

Suitable for craving a house building with the concept of "green environment".
